# Religious

***“Unless the LORD builds the house,  
Its builders labor in vain.”  
- Psalm 127:1***

## PHILOSOPHY

Guidry Coastal-Architecture Inc. approaches building design with careful consideration to human needs, spatial functions, and the relationship of the building to its specific context. Our firm uses expertise in planning, aesthetics, and site design to produce designs for new buildings, renovations, and restoration projects./Guidry Coastal-Architecture also provides additional services including site selection, master planning, structural reviews, existing building evaluations, condominium documents, as built drawings, and project budgeting.

Guidry Coastal-Coastal Architecture offers clients a comprehensive design package. We interface as required with all review agencies, government officials, and local officials prior to beginning a project to determine the impact of these on our project. Prior to designing a building, we also consider a project’s feasibility relative to possible sites and their characteristics, programming, and economic impact. Once the scope for the project is established, the design process can be initiated. Our firm offers services from this initial stage through construction and owner occupation.

*Our firm has had the opportunity to design many buildings of diverse size and function. The experience and talents of our personnel are directed towards developing creative solutions, which strongly consider, site, economic, function, and aesthetic issues.*
